

Day

1.

2.

3.

A screenshot of the DMOJ registration form. The form includes fields for Username, Email, Password (with a strength indicator), Password confirmation, Timezone (with a dropdown menu showing "Toronto"), Default language (with a dropdown menu showing "Python 3"), and Affiliated organizations. At the bottom, there is a reCAPTCHA "I'm not a robot" checkbox and a "Register!" button. A note at the bottom states: "By registering, you agree to our Terms & Conditions."

4.

A close-up of the registration form details. A red arrow points to the "Default language" dropdown menu, which is set to "Python 3". Another red arrow points to the "Affiliated organizations" field, which contains the text "Castlebrooke S.S." and a close button (X).

Gr11:

CCC 2017 J2 - Shifty Sum

- Just simple while loop with a counter

Gr12:

CCC 2019 S2 - Pretty Average Primes

- Uses Sieve of Eratosthenes.
- Some basic loops and simple math

- You all have 30 minutes timer to complete each question
- If you need help or don't understand something, raise your hand up!
- It's fine if you can't get the solution in time, this is for practice

Pseudo Code for J2 Shifty Sum

1. Take inputs (number and shift value)
2. Create counter = 0
3. Create result variable to store the answer result = 0
4. Loop from 0 to shift value+1 (Since we want to shift n by k amounts)
 - a. $\text{result} += (\text{number} * 10^{\text{counter}})$ $(12*10^0) + (12*10^1) + (12*10^2) \dots$

Print out result

Remember: that the range function starts at 0, and goes to n-1

For example `range(5) = 0,1,2,3,4`
